

**auto-Q**  
retractable seating

# in location

**auto-Q retractable seating is an efficient design to accommodate seated audiences whilst enabling versatile use of space.**

**The tiered structure has an option of benches or individual seats. The design complete with seating, flooring, steps and safety rails folds in and out with a concertina effect to store compactly against the wall or seat an entire audience.**

Strength and safety are inherent in the design, the wheeled framework is operated at the touch of a button. Constructed in modules to suit the space, auto-Q can be adapted to individual requirements; offering a choice of frame size, options in one piece or folding seats, plus various seat and floor finishes.

## THE SETTING

Transforming spaces in existing buildings, or as part of a new build, auto-Q retractable seating can totally change the function of a space, simply by adding audience facilities.

The **main hall, sports hall, conference hall, gym** or an array of different sized indoor spaces, can be simply and effectively turned into an auditorium or theatre. Helping to make a space versatile and increase its usability, auto-Q can fold compactly to the wall to give the full size of a room, or fold out to create fully tiered seating.

auto-Q can contribute to creating a total theatrical environment and can work effectively in conjunction with other individual products from Stage Systems including staging, AV, curtains and sound and light equipment to create a total drama solution.

## OUR SERVICE

Stage Systems is an established company, with experience in offering a complete service, working with individual institutions, contractors, consultants, architects and designers. Product installations include BSF projects and academies as well as individual schools, community and commercial projects.

Offering expert advice, site surveys, installation and a full after sales service, Stage Systems bring together all the elements of an excellent product and a complete service with auto-Q.

# product detail

The versatile nature of the seating framework enables the design to accommodate a small group of spectators to a vast audience, which can temporarily transform a space with a strong and safe structure, personalised with a choice of seating styles, finishes and colours.

## options

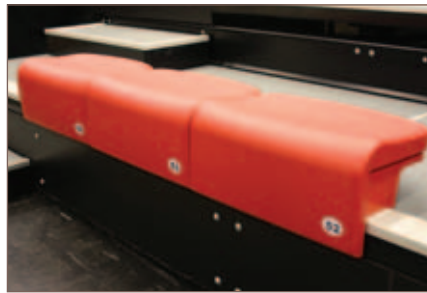

### SEATING

#### One piece seating

**Prelude** bench seat. Produced from high pressured laminate, the bench option offers a basic seat solution, with no individual allocation for a greater seating capacity.

Available in grey or timber laminate finish.

**Vogue** plastic blow-moulded seat. Ergonomically designed, this simple option offers a performance seat, with great longevity.

Available in a choice of colours.

#### Folding chairs

**Luxe** plastic molded chair. A luxurious folding chair, with sculpted backrest and curved seat, offering generous comfort and durability, with optional armrest.

Available with a plastic finish, upholstered cushion pads\* or fully upholstered. All finishes are available in a variety of colour options.

\* with black plastic finish unless otherwise stated.

**Classic** upholstered chair. A timber constructed folding chair with curved and padded design to both backrest and seat, offering strength and comfort.

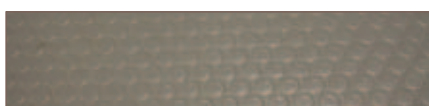

Available in a full range of upholstery colours.
