

**OVERVIEW  
BROCHURE**

# making space work

## WHO WE ARE

An energetic team including managers, designers, marketers and sales people who work in unison to provide the customer with the ultimate solution to modular staging and tiering, inclusive sound and light packages and event platforms, each designed to make space work.

## HOW WE WORK

Stage Systems' success is not only due to the quality and ingenuity of products, but also due to the people and provision of service. With the aim to provide true satisfaction, the people within the Stage Systems team have a passion for great customer care and offer honest, expert advice and information. With individual design capabilities, on-site visits and demonstrations, personal deliveries and a keen after sales service, it's no wonder so many new customers come to Stage Systems through recommendation.

## PROJECTS

Supplying products into a variety of markets, with simple ideas producing incredible results, Stage Systems has been involved in the creation of theatres, simply upgrading or totally revamping schools, transforming churches and providing private homes and hotels with brand new rooms and revenues! Becoming a significant part of many BSF (Building Schools for the Future) projects, Stage Systems are also a major player in the regeneration of UK schools.

## PRODUCTS

The concept behind every Stage Systems product is to make space work. Creating and developing these space saving solutions appears in the form of simple, safe construction and neat storage; utilising existing space by easily constructing performance or event platforms which can then be compactly stored away on purpose built trolleys, converting the space back for its original purpose. Kind to the environment with FSC sourced products and FIRA tested, ensuring safety, plus the simple design makes it user friendly too.

# market sectors

**Stage Systems' products are versatile in form, use and market. Various uses for the products within each market are apparent, but that is where the differences end, as each sector utilises the nature of Stage Systems' products, utilising their safety and strength and maximising the space saving opportunities to their own potential.**

## EDUCATION

Products are popular in primary and secondary schools as well as academies, colleges and universities. The space saving characteristics of Stage Systems' designs are perfectly matched to the education environment, where halls and drama studios are utilised as dining halls, gyms and exam rooms and then transformed into a theatrical environment for assemblies, productions and performances.

### Education Customers Include...

- Leeds BSF
- Derby PFI
- University of York
- Ilford County High School
- Stakesby Community Primary School
- Our Lady's Junior School

## COMMUNITY

A sector with an array of interests, the community market includes churches and associated groups, village halls, drama groups, arts and choral groups, festivals and councils. With small to vast budgets this group has a multitude of uses for Stage Systems' products, often using a location that is used by many different people and purposes, the space saving features of Stage Systems' products are ideal.

### Community Customers Include...

- Canterbury Cathedral
- Epsom Methodist Church
- Southwell Minster
- Goldthorne Theatre Company
- Blewbury Players
- Loxhore Village Hall

## COMMERCIAL

Companies offering a venue for recreational or business events, weddings or celebrations require a means to utilise a room for a variety of purposes. Seeking efficient ways to alter a room's use, commercial companies are utilising Stage Systems' products in order to transform a basic function room into a magnificent dance space or amazing performance venue.

### Commercial Customers Include...

- The Haymarket Hotel
- Paisley Town Hall
- The Belfry
- Selfridges
- Kneller Hall, MOD
- Games Workshop

# staging

## ADAPTABLE PERFORMANCE SYSTEMS

The modular design for resourceful staging creates a single or multi-level platform with a variety of finishes and accessories. Designed to make full use of available space, each stage can be formatted in various configurations then packed and stored compactly away. With kits, standard products and bespoke designs available, there is a Stage Systems staging solution to fit any requirement.

### Q-build dismountable staging

Multi-functional, dismountable staging that is easy to build, dismantle and store.

Q-build's original design has proven time and time again to be an amazingly valuable piece of equipment in so many environments, from schools, drama clubs and societies to community events and business functions. The versatility of the design gives a flexible solution to a single or multi-level stage. Built without the use of tools plus reversible decks offering an alternative finish, Q-build has the ultimate formula for simplicity, strength and adaptable structure.

### multi-dek performance staging

A stage structure with true strength and versatility designed for a multitude of uses, in particular dynamic performance, movement and dance.

Multi-dek's adaptable design ensures that it can be used as a permanent or temporary structure. The modular components form single or multi-level platforms, with a larger deck design and the strong combination of mild steel leg frames and brace rails; multi-dek forms a robust structure to withstand mass weight and support extremes in performance, dance and live music.

### keystage single level staging

A simple and strong, single level modular stage.

Keystage's straightforward design provides a no frills staging kit, a fundamental option to fulfil requirements for a basic performance platform, but where strength, simplicity and an adaptable structure are still key to the design.

# tiering

## RAISING PERFORMANCE IN ROWS

**Modular demountable tiering for seated or standing performances for large or small groups, forming a robust structure with hand rails to the back and side for ultimate strength and safety, enhancing acoustics, vision and utilising intelligent use of space.**

### Q-plus modular tiering

Versatile design offers various formations with overlap or continuation tiering in addition to a flat or split-level stage construction and used in conjunction with axess chairs offers a strong and secure seated tiered structure.

Creating an elevated tiered platform and enhancing acoustics for magnificent choral performances, alternative drama routines or amazing orchestral recitals, Q-plus has strength, safety and compact storage built in. Ultimately resourceful, Q-plus can also be utilised as a stage, quickly producing a single or multiple level adaptable platform with reversible decks, for complete choice in performance.

### Q-stand modular riser

The simple, robust structure allows for a variety of configurations of overlap tiering for standing performers and photography.

Forming a standard or bespoke framework with decks, handrails and safety bars, Q-stand has quick construction and simple storage combined with the versatility of form and creation of height to produce an amazingly safe and strong tiered performance structure.

### axess auditorium chairs

Lightweight and hardwearing auditorium chairs providing comfort whilst encouraging good posture.

The quick and simple linking system generates a seating system efficiently and effectively, building rows of upholstered chairs for use on floored or tiered surfaces, such as Q-plus tiering, with a reverse cantilever design for comfort, safety and storage.

# total drama solutions

## DEVELOPING PERFORMANCE

**Stage Systems' experience in the supply of performance platforms has led to a natural progression into complete performance packages. From single product integration to new build or refurbishment overhaul, Stage Systems has the total drama solution.**

## total drama solutions

**versatile performance**

Individually designed solutions can combine performance staging with lighting and controls, sound equipment with seating and curtains and room design with expert advice, to produce the ultimate in drama, dance and performance facilities.

Consultancy is essential, in addition to working closely with clients to produce both simple and complex designs to make effective and innovative use of space, thus generating creative solutions that are completely tailored to individual projects.

Stage Systems' teams work in conjunction with everyone involved in the project, from local authorities, to suppliers and contractors, producing amazing concepts that are transformed into reality with integral design, implementation, management and maintenance.

### Q-sound

Compact, portable sound systems with integral features to offer completely comprehensive audio facilities. They can include different variations for individual requirements and budgets including speakers, amps and microphones.

### Q-light

Inclusive portable lighting systems combining all the components for theatrical illumination including lanterns, dimmers and colour filter, with a choice of kit dependant on requirement and budget.

# event platforms

## BASES FOR ENTERTAINMENT

**Producing innovative solutions to transform a space from a basic room into an amazing event space simply through creating a new floor.**

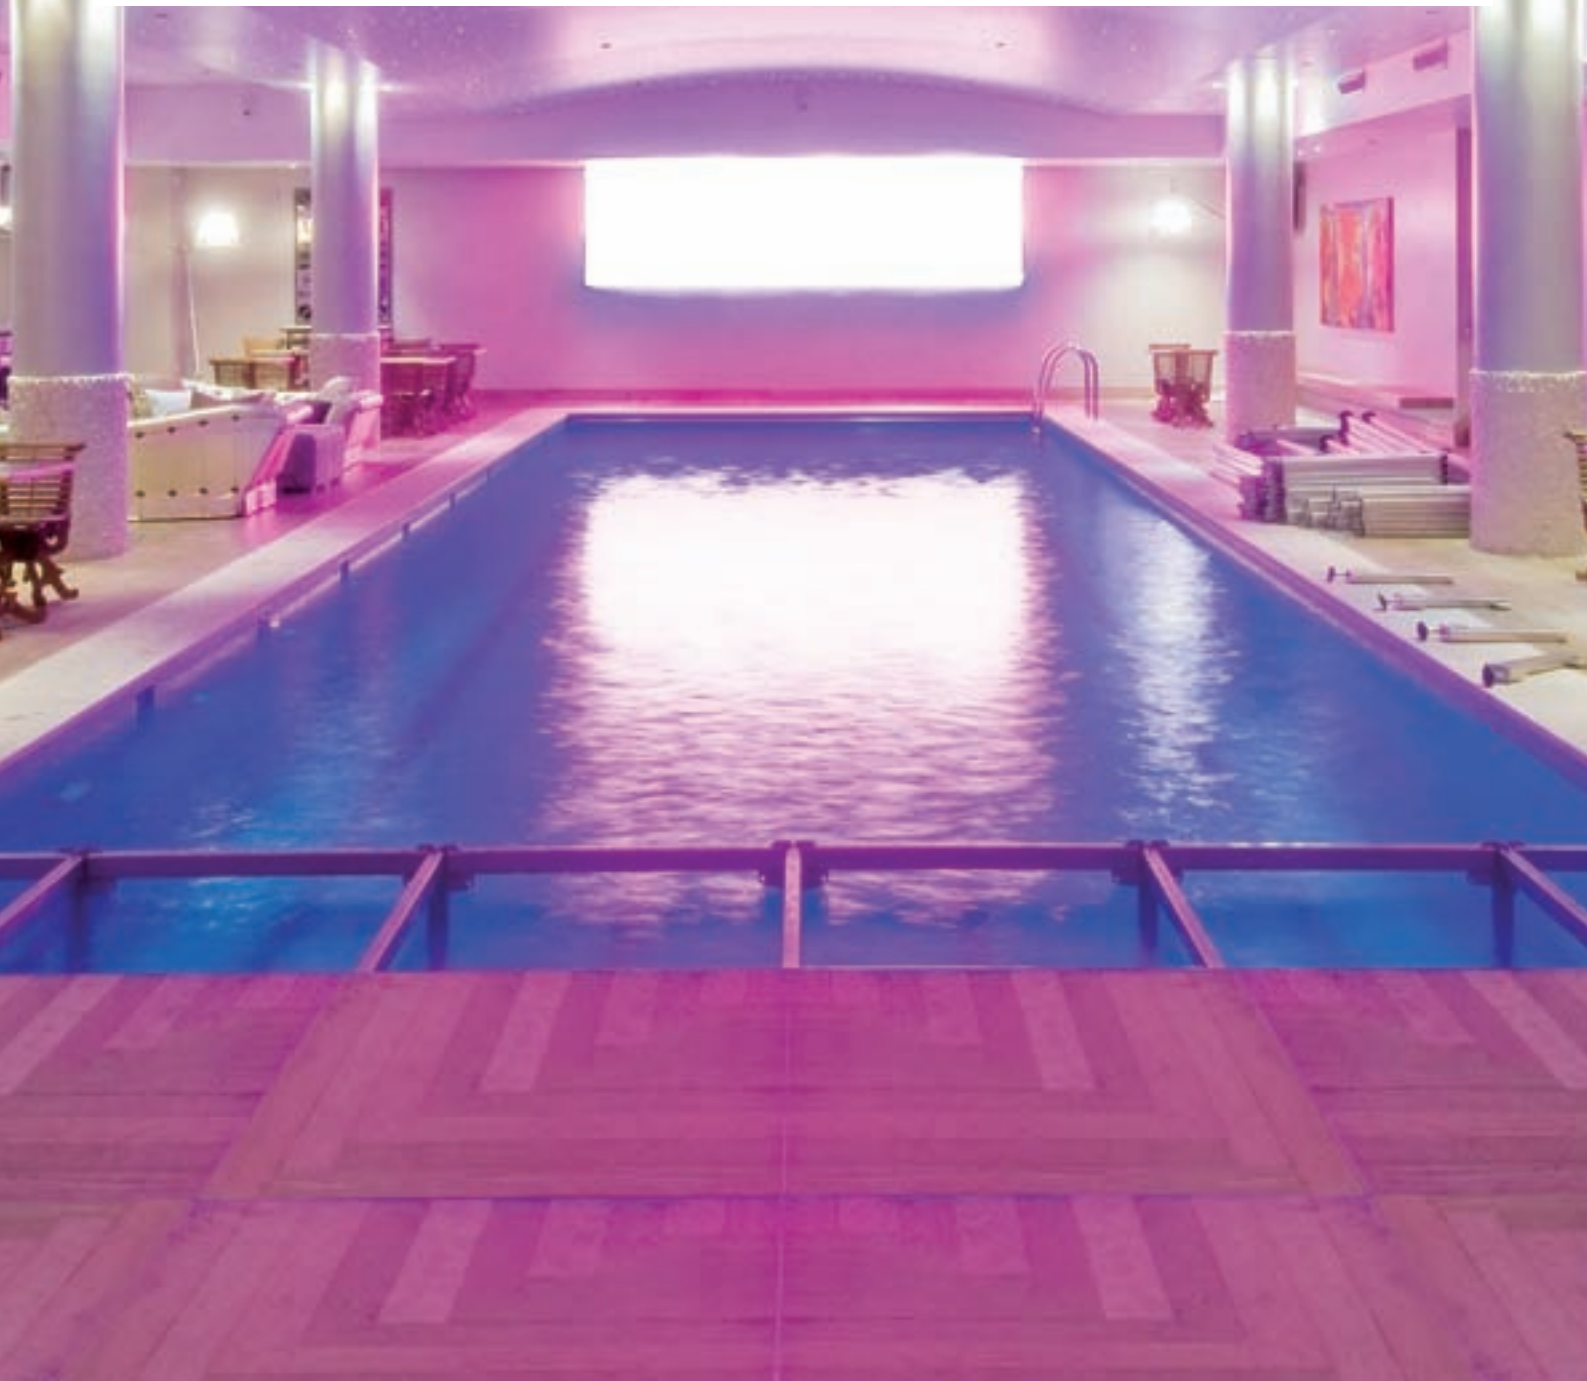

Swimming pool infills create an alternative use of a swimming pool, through building a new floor over the water.

Utilising existing space, pool-dek transforms a wet environment into a dry event space without even draining the pool. The stainless steel framework is constructed in the pool itself and the decks are built across the surface, with trip free surrounds for continuity to the original poolside. The robust construction, hardwearing surface and bespoke design offer a beautiful platform for parties, functions and weddings.

Q-step modular dance floors transform a plain area into a wonderful dance space.

A luxury dance floor system, created with bonded parquet blocks and constructed by simply slotting panels together to form smooth flooring with a trip free surround, transforming a space into the ultimate dancing venue for amazing weddings, celebrations and events.
