

Q-link – auditorium chairs

Comfortable auditorium chairs designed with great strength and simplicity. The Q-link chairs can accommodate audiences and performers alike, can be set up quickly and offer great comfort with upholstered seat and back support.

Linking chairs

SEATING DESIGN

The reverse cantilever design offers a chair with great strength and stability. The chair base distributes the weight evenly, ensuring comfort and safety for any physique, plus contoured seat and back aids postural support.

The simple linking mechanism on each side of Q-link quickly links the chairs together to form a neat, safe and rigid row. The linked chairs can be set out in straight or curved rows and can be used directly onto the floor or on staging and tiering.

When not in use Q-link chairs stack on wheeled trolleys for compact storage.

Linking mechanism

Q-link conforms to FIRA tests BS EN 1022:2005 and BS EN 15373:2007 test level 2 non domestic seating. Suitable for general contract use.
