'Our mission is to be the business of choice for interior solutions: we will achieve this as a team, combining a 'can do' attitude with quality service, at the right price, to deliver a great customer experience.'

David Ritchie, grown up.
Chief Executive Officer, Havelock.

about us

AS THE ESTABLISHED MARKET LEADER IN THE DESIGN, MANUFACTURE AND SUPPLY OF QUALITY FURNITURE FOR EDUCATION, WE HAVE WORKED WITH THOUSANDS OF SCHOOLS, COLLEGES AND UNIVERSITIES.

Customer service

Our approach to customer service is consistent regardless of the scale or nature of the requirement. We constantly strive to deliver the highest quality products coupled with the best possible service.

Innovation

We are committed to remaining at the forefront of innovation in our field. In recent times, educational environments have changed beyond recognition: group working, the integration of constantly evolving ICT requirements and different approaches to teaching and learning have all combined to ensure that maximum flexibility emerges as a dominant theme in furniture design. Personal learning devices, technology and computers are regarded by many as essential classroom equipment, together with ergonomic variations on desks, chairs, storage cupboards and shelving. Learning environments will continue to evolve.

Quality

We take great care at all stages of the manufacturing and installation process to comply with British and International Standards. Havelock is quality assured to ISO 9001:2008, and is a member of Constructionline, the UK's largest register of pre-qualified construction contractors and consultants. All ranges are type-tested to standards recommended by the DFE and the Scottish Executive. Havelock is listed in the DFE Broadsheet 31 Educational Furniture Database: "Setting The Standards".

environmental statement

IT IS OUR OBJECTIVE TO CONDUCT BUSINESS IN A MANNER THAT IS BASED ON THE HIGHEST STANDARDS OF ETHICS AND INTEGRITY AND IN A MANNER WHICH MINIMISES THE IMPACT OF OPERATIONS ON SOCIETY AND THE ENVIRONMENT.

Compliance with regulations is merely the baseline from which we start the journey towards excellence. To this end policies, management focus and partnerships with key stakeholders have been developed to ensure a culture of progressive improvements in the key areas of the environment, health & safety, business ethics, employees and the community.

Health & safety

The Board regards Health and safety as its number one priority. Along with numerous health & safety campaigns, initiatives and departmental meetings, a monthly report is prepared by the Chief Executive for discussion at Board level. The report considers accident trends, lost days, preventative and corrective actions and any other pertinent health and safety related matters.

The environment

Our approach to minimising the impact of our operations on the environment is articulated in our Environmental Policy. Our primary aim is to enhance sustainability and to reduce the Group's carbon footprint through focus on the key areas of greenhouse gas emissions, waste and energy reduction. Delivery of the Group's environmental programme will be assured through accreditation to environmental management standard ISO 14001.

Sustainability

Protecting the earth's resources for the benefit of future generations is seen as a key part of social responsibility. We strive to ensure that all key raw materials are procured from sustainable or recycled sources. The use of sustainable and recyclable materials is an explicit part of the design risk assessment process incorporated into all product development. Our commitment to the environment permeates through the supply chain. Sustainability is a key criterion in vendor selection and appointment. Certification by the Forest Stewardship Council FSC® and Programme for the Endorsement of Forest Certification PEFC® was achieved in 2009. Both organisations promote responsible forestry throughout the world.

'When I rule the world
I will stop people cutting
down trees and make everyone
put their litter in the bin.

I will also stay up late and
eat sweets for breakfast'

Amy, age 10.
Future Prime Minister in training.

'If I aim for
the moon, will
I hit the stars?'

Conor, age 7.
Pilot in training.

our services

Concept & design

Our strong in-house team, with design, planning and architectural expertise, is responsive to our clients' overriding commercial aims. We provide concept design, design development, prototyping and space planning and also support Local Authority submissions and landlord approvals.

Working with architects, developers and lead contractors, we generate 3D output through the application of Revit® Autodesk software platform, specifically designed for Building Information Modelling (BIM).

Value engineering

A core competency of Havelock, we apply our experience to design, materials specification, production and construction methods to engineer increased value. Cost savings of between 10-20% are not uncommon without compromising form and functionality.

Manufacturing

Our 200,000 sq ft manufacturing facility makes us one of the UK's largest timber, metal and solid surface fabricators. Employing over 200 skilled operators and using state of the art CAD/CAM machinery, the factory has the capacity to handle high volume batch production as well as short runs and prototypes. Stringent controls safeguard quality and consistency whilst 5S and Kaizen foster a culture of continuous improvement.

Sourcing

Our approach to sourcing balances lead times and cost by combining the best of UK, European and Far East procurement. Our global teams have built up proven and established high quality, consistent and competitive supply chains - giving us access to more than 1 million sq ft of in-house and outsourced timber, metal and acrylics manufacturing capacity - and our team in Shanghai has been delivering credible best cost alternatives for over 10 years. Crucially, Havelock is diligent about ethical and sustainable sourcing.

Logistics and installation

Dedicated, experienced teams are mobilised to site to install furniture, fixtures and fittings, typically supplied by Havelock, within tight deadlines and often in live environments. Our dedicated, fully trained team works to "right first time" principles, with regular vetting of our extensive and reliable network of over 400 subcontractors. We invest crucial planning time at the start of each installation to manage risks and minimise time onsite. Considerations include site access, logistics, noise, signage and hoarding, security and waste management.

With over 4,000 projects delivered annually across the UK, Europe, Asia and Australasia, we have a track record of scheduling site deliveries to ensure furniture is delivered on time and, where applicable, corresponding to large scale roll-out programmes. Our 100,000 sq ft warehouse provides the capacity for pre-build and storage. We also have access to 2,500 fleet vehicles and 90 depots through our logistics partner.

Project review and learning

Our delivery credentials are built on a philosophy of continual review and applications of learning. At every stage of our end-to-end service we apply rigorous review protocols, constructively challenging ourselves and our partners to identify where and how we can improve our products, service, delivery and commercial relationships.

Through its education
brands ESA and Stage
Systems, Havelock has a
long heritage of creating
progressive learning spaces
that facilitate current
learning methodologies.

*'Our design team
has created a range of
modular flexible furniture,
which inspires a journey for
children to play, learn and grow.
The possibilities are limited
only by one's imagination.'*

John Gillespie, grown up.
Design & Innovation Director,
parent and grandparent

UNLIMITED
POTENTIAL

Let us create what you imagine...

SAMPLE CLASSROOM LAYOUT AND DESIGNS.

The planned layouts shown, were created to illustrate the flexibility of the 'imagine' range.

Set in a small area of 60m², using identical units of furniture within the same space. We wanted to demonstrate different types of plan layouts that can be put together easily and quickly.

When children dream they enter their very own world, a world that knows no bounds and their imagination rules. Parents dream (aspire to enable) of helping their children to achieve everything they possibly can.

Our children's world, however, needs to be safe and environmentally considered; challenges that we, along with education professionals, have considered whilst designing our new flexible and modular range of early years furniture.

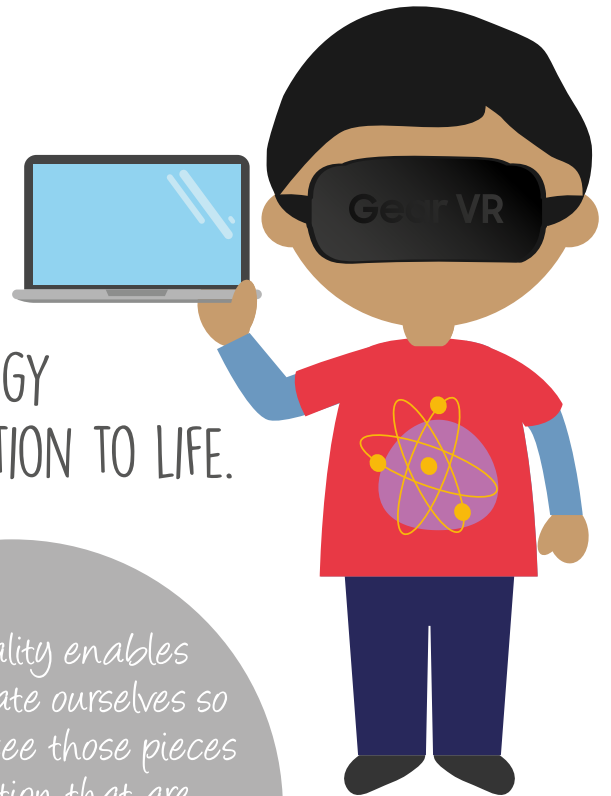

Made to encourage a seamless transition to play, learn and grow, the design of the environment we create should inspire them to **imagine**.

USING THE LATEST SOFTWARE AND TECHNOLOGY OUR DESIGN TEAM CAN BRING YOUR IMAGINATION TO LIFE.

Through the use of virtual reality we can showcase designs in a three-dimensional computer generated environment.

You can explore and interact using our headsets and be immersed in a 360 degree world.

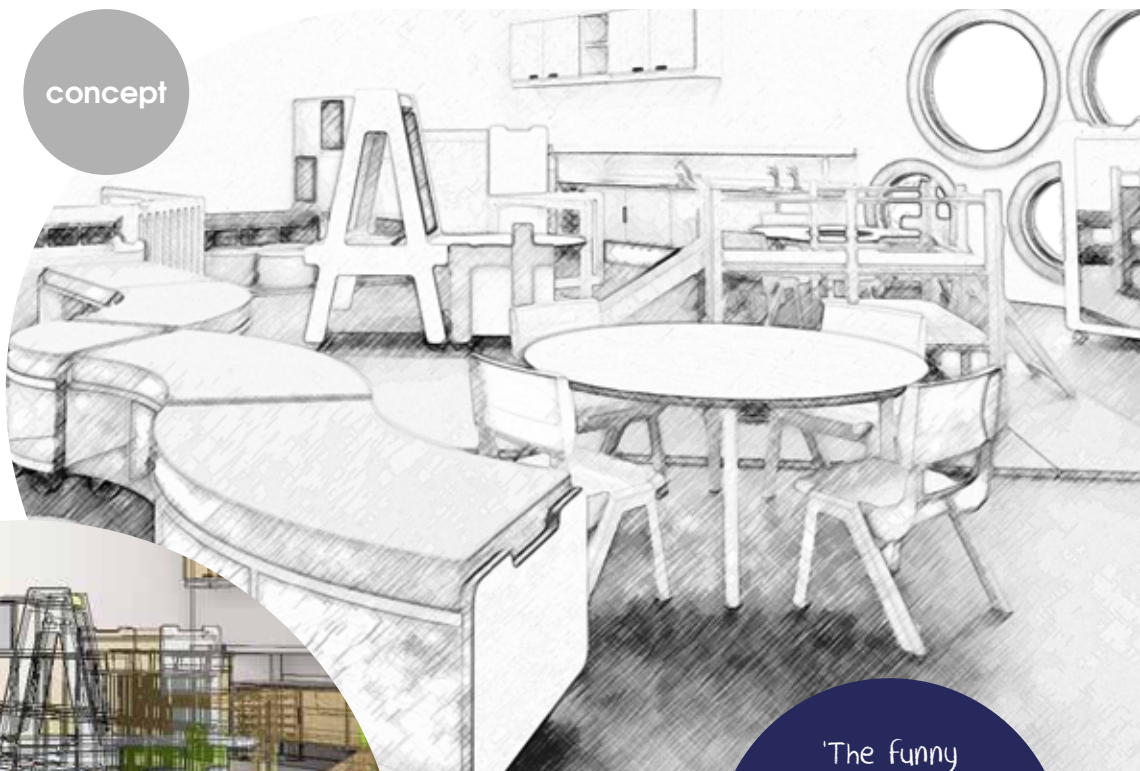

'Virtual reality enables us to recalibrate ourselves so that we can see those pieces of information that are unknown to us but have become necessary for us to understand.'

Colin Bell, grown up.
VR Ninja & BIM Manager Havelock

storage

'Our flexible range offers almost limitless layout configurations, ideal for today's ever changing requirements.'

Paul Doleman, grown up.
Product Development
Director, Havelock.

UNITS ARE DESIGNED TO ALLOW AN INTERCHANGEABLE COMBINATION OF SHALLOW, DEEP OR EXTRA DEEP TRAYS.

Our range of mobile storage furniture offers practical yet stylish storage solutions. Whether you prefer neutral and natural or vibrant and vivacious our range has something for you. Available in sizes to suit ages 2-12, our range incorporates a durable PU edge finish.

All items are available in maple or white with or without accent colours.

Accent colours are best described as coloured tops and bottoms.

1

Double tray unit 8

Designed to take 8 shallow trays or equivalent combinations.

mobile unit.

versatile staging

A COMPACT MULTILEVEL PERFORMANCE ENVIRONMENT WHERE PRESCHOOL AND NURSERY AGE CHILDREN CAN TRULY EXPRESS THEMSELVES THROUGH ROLE PLAY OR STAND PROUD FOR THEIR GRADUATIONS AND ACHIEVEMENTS.

Our staging kits are ideal to help improve physical development, expressive arts, language, personal development and communication.

Our versatile staging kits range in complexity from starter kits (suitable for organisations with limited budget or/and space for staging) to larger kits where customers require a bigger staging area.

All of our kits are specifically designed to work together – meaning that over time you can add additional kits or individual components depending on your exact performance requirements.

Our staging is simple, strong and flexible, making it ideal within a range of environments. Our popular tried and tested demountable staging offers a range of accessories and finishes. With the ability to achieve multiple configurations such as catwalk layouts or multi height stages from the same equipment, you can be confident that, whatever your requirements, you will be able to successfully adapt your equipment to suit. The system can then be neatly stored away when not in use.

'I want to be famous when I'm older. I love dancing.

I've been on stage at my school I got to sing with my friends and my granny saw me.'

Zara, age 7.
Pop star in training.

Many pieces are designed for multiple applications. Much of 'imagine' is mobile, to fit around its users and the space it occupies.

'The reading pod
was a brilliant place
to chill-out and read,
very comfy too.'

Calum, age 11.
Olympian in training.

'The colours are so awesome and the book pod is really cool.

I like how it was a hole in the wall."

Oscar, age 5.
Racing car driver in training.

A report commissioned by the University of Salford in 2015 highlights the importance of the physical characteristics of classrooms and their impact on pupils' learning progress. The findings showed that stimulation for learning should be "neither chaotic, nor boring" and this was a key consideration in the design of the 'imagine' range.

FOR BESPOKE ITEMS, SUCH AS THE READING POD SHOWN HERE, PLEASE CONTACT ONE OF OUR SALES MANAGERS TO DISCUSS YOUR REQUIREMENTS.

furniture specifications

Carcase

Carcase panels are constructed from a combination of high-performance, melamine-faced fibreboard (MFMDf) and particleboard (MFC).

These materials are approved to British Standard EN 14322: 2003. Carcase end panels are constructed from 18mm MFMDf with soft curved corners and radiused edges for improved safety. They are finished in an extremely durable graphite grey Polyurethane edging system (PU). PU edging is slightly textured and softer to the touch - it does not chip, peel or fade, nor can it be removed. It provides a seamless water resistant edge which is resilient against impact and abrasion. End panels are also shaped (scalloped) to provide an integrated 'handle' feature to improve ease of unit movement.

The remainder of the carcase panels - tops, bottoms, backs and shelves are constructed from 18mm particleboard edged in a 2mm impact resistant ABS edging to match the carcase colour. All ABS edging is finished with a 2mm radius to avoid any sharp corners or edges. Units are predominantly dowelled, glued and cramped resulting in a rigid carcase construction. Additional cam and dowel fixings are used where required.

Drawer fronts and doors (front sets)

Door and drawer fronts are constructed from 18mm MFMDf with soft curved corners and radiused edges for improved safety. Both are shaped (scalloped) to provide an integrated 'handle' solution thus avoiding any protruding knobs or D handles. Door and drawer fronts are finished in the durable and safe Polyurethane edging system as described above.

Backs

Carcase backs are made from 18mm particleboard. The back is thicker than fixed furniture (8mm) to ensure the furniture withstands the rigors of frequent movement.

Castors (mobility)

Mobile units are fitted with 4 robust castors 2 of which are fitted with brakes. The castors provide clearance of 75mm and are rated to 50kg each. They provide a smooth action to facilitate ease of movement.

Drawers

Drawer sides are made from epoxy powder-coated mild steel finished in cream, RAL 9001. Drawer bottoms and backs are constructed using 15mm melamine-faced particleboard, lipped on exposed edges with 1mm ABS. The drawers are mounted on soft-rollered runners for a smooth action.

Shelves

Dependent on height storage, units come fitted with 1 or 2 adjustable (loose) shelves. Shelves are manufactured from 18mm particleboard, edged all round in 2mm ABS edging to match the carcase finish and radiused to avoid sharp edges and corners. Shelves are supported on easy fit transparent shelf clips with 5mm steel pins.

Hinges

All doors are hung on durable concealed cabinet hinges to reduce 'finger trap' potential and ease cleaning. Hinges are adjustable to 110 degrees and are fitted using euro screws to ensure strength of fixing and durability. All hinges have integral catches and soft close actions which prevent the doors from slamming.

our factory

Quality

Our clients' vision starts to come to life in our factory. At 200,000 sq ft, Havelock's factory is one of the largest in-house timber, metal and solid surfacing facilities in the UK. Stringent controls safeguard quality and product consistency and we use Kaizen to continuously improve.

Detail

Using 3D CAD, our technical engineers meticulously specify and clarify the smallest features, right down to the screw size. Their attention to detail generates pre-production drawings that accurately replicate our clients' expectations. These drawings are then used to programme the machines in our factory, in essence bringing them to life.

Prototype

Prototyping is an essential part of product development. As well as being equipped for high volume batch production our factory processes prototypes and 'first off' samples. These prototypes prove the design concept and confirm costs ahead of volume production.

The first time clients visit our factory, especially to view prototypes of their furniture design, they are always impressed.'

Peter McAllister, grown up.
Manufacturing Director, Havelock.

THE IMAGINE RANGE
IS MANUFACTURED
AT OUR FACTORY
IN KIRKCALDY.

We believe that the importance of the learning environment - including its design and the flexibility and quality of the furniture, fittings and equipment provided - cannot be overstated.

our standards

Innovation

We are committed to remaining at the forefront of innovation in our field. In recent times, educational environments have changed beyond recognition: group working, the integration of constantly evolving ICT requirements and different approaches to teaching and learning, have all combined to ensure that maximum flexibility emerges as a dominant theme in furniture design.

Personal learning devices, technology and computers are regarded by many as essential classroom equipment, together with ergonomic variations on desks, chairs, storage cupboards and shelving. Learning environments will continue to evolve. At Havelock, we provide creative solutions, whatever the scale or complexity of the customer requirement from a single item to a multi-school, new-build project. We will work with you to create learning environments that inspire.

Quality

We take great care at all stages of the manufacturing and installation process to comply with British and International Standards. Havelock is quality assured to ISO 9001:2008 and is a member of Constructionline, the UK's largest register of pre-qualified construction contractors and consultants. All ranges are type-tested to standards recommended by the DFE and the Scottish Executive. The ESA McIntosh range is listed in the DFE Broadsheet 31 Educational Furniture Database: "Setting The Standards".

We host an ongoing, continuous improvement programme which delivers significant benefit to our clients, ensuring on-time-in-full delivery of our products and services.

WE PRIDE OURSELVES ON OUR QUALITY STANDARDS,
OUR SKILLED PEOPLE AND OFFERING THE BEST
TECHNOLOGY TO ENHANCE OUR SERVICE TO YOU.

Ordering & general information

We would advise customers when choosing their colour scheme, to carefully consider tonal and shade contrast between tops, carcasses, fronts and handles.

This will benefit customers who are visually impaired and it is a functional requirement of DDA 95 (Disability Discrimination Act 1995) and BS 8300: 2001.

Colours in this brochure should be used for guidance only, as variations may occur during printing.

Orders

All orders are subject to our standard terms and conditions, a copy of which is available upon request. All our prices are also subject to review and change. Our payment terms are standard proforma invoicing terms, unless a credit facility has been approved in advance.

Payment is due 30 days from invoice date.

All prices exclude VAT.

Credit card payments are accepted.

Products

As our products are available in a wide range of sizes and finishes, most items are manufactured to order.

Please consider colour choice before ordering so that we can deal with your requirements immediately. Call us if you have any questions regarding finish availability or cost. Samples of certain finishes are available on request.

We may accept order cancellations up to pre-production at our discretion. Cancellations after final information received may incur a re-stocking charge.

All products and specification are subject to availability.

Alternative product options may be offered.

Delivery

Delivery charges will be dependent on the quantity and size of your order and your location.

We also offer an installation service - please contact us for details. Most items are fully assembled at point of delivery, although some require an element of self-assembly.

Certain products may be delivered using a courier or third party delivery vehicle in order to offer best value.

'The small print'

All orders and products are subject to standard terms and conditions. A copy is available on request.

Whilst every effort is taken to ensure descriptions in this brochure are accurate, changes to products may occur. We therefore reserve the right to make necessary substitutions, and changes to specifications, finishes or prices at any time, whilst ensuring that standards of quality, value and performance are maintained.

Colours in this brochure should be used for guidance only, as variations may occur during printing.
